EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Barry Sammons on 9/27/2004.

The application has been amended as follows:

Claims 8 and 9 have been canceled.

New claims 10 and 11 have been added.

Claim 10. (New) A method for reducing compressive forces on soft tissue disposed between the pelvis of a subject and supporting structure, the steps comprising:

implanting a first permanent magnet into a bone of the subject's pelvis; and
fastening a second magnet to the supporting structure such that a repelling force is produced that acts on the first and second magnets to reduce the compressive force acting on the soft tissue disposed therebetween when the subject is seated on the supporting structure.

Art Unit: 3736

Claim 11. (New) The method as recited in claim 10 in which the first permanent magnet is implanted in the ischial tuberosity bone.

The following is an examiner's statement of reasons for allowance: The prior art does not teach a method as claimed including implanting a magnet into a bone of the subjects' pelvis and fastening a magnet to a support surface such that the two magnets produce a repelling force to reduce the compressive force on the tissue as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel G Gilbert whose telephone number is 703-308-3553. The examiner can normally be reached on M-F 5:30-2:00.
